

The first antibacterial basket handle on market

Antibacteriana . Antibacterienne
Antibacterial . Antibakterielle

**Shop
& Roll**

**The first basket
on the market
with an
antibacterial
handle**

What do your customers think when they find a dirty basket when they go shopping?

"They should be cleaner, especially in food supermarkets because they are in contact with food"

"I always feel that the handle has been held by lots of people and I can catch anything..."

According to the results of studies*, "the handles of shopping carts are listed among the dirtiest of public surfaces (where there is the greatest number of bacteria)".

The antibacterial handle has been manufactured from the first inorganic antimicrobial deodorizing agent developed in the world ^{Antimicrobial} Zeomic

- **Inhibits** bacterial growth.
- **Prevents** offensive odour by controlling growth of bacteria and fungus.
- Food **contact** safety.
- Skin irritation and toxicity tests have been **successful**.
